- Water

## OUR LEARNING

*focus...*

### Reading:

We will continue learning about Holidays and Celebrations then enter a new unit to learn about Weather and Seasons. We will practice identifying the topic and multiple details in a text, describe how pictures support meaning in a story, use main characters, setting, and important events to retell a story, and identify informational text features. We will focus on letters Jj, Kk, and Yy.

### Math:

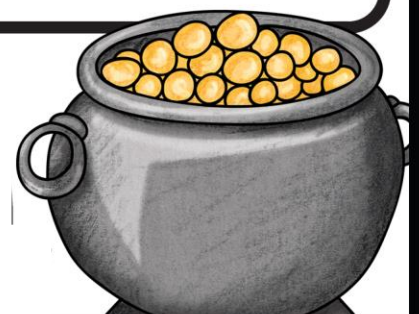

We will practice measuring length, comparing weight, and comparing volume.

### Science:

We will learn about the clown fish. We will also learn about the physical characteristics of plants and animals and compare plants and animals by observable physical characteristics and behaviors.

### Social Studies:

We will learn about Women's History, time, and the passage of time (the clock and calendar).

Teachers: Ms. Lexi, Ms. Anna, and Ms. Jasmine!
