

CLASS NEWS

FEBRUARY 2025

ELA/WRITING

This month, students will continue engaging with close reading texts to strengthen their comprehension skills. They will focus on describing story elements and using context clues to deepen their understanding of the text. Additionally, we will be working on recognizing and applying vowel teams to improve reading and spelling accuracy.

In writing, students will expand their opinion writing by incorporating simple modifiers and interjections to make their ideas more expressive and engaging.

MATH

Students will continue learning about measurement, focusing on understanding and estimating lengths.

Science

In science, students will have fun exploring Scope 6: Environmental Characteristics, where they will learn about how non-living things help living things, ecosystems, and the basic needs of organisms.

Social Studies

Students will be learning about timelines and the contributions of African Americans

Reminders

We kindly ask if you can volunteer by donating bottled water and Lysol wipes, as these items are still needed in our classroom.

Upcoming Events
